

New Zealand wetblue bovine hides / grains

The production goes from October to August with peak production from January to June.
New Zealand hides are:

- 100% machine flayed
- Fleshed in green
- Head and shanks trimmed
- Various selections are available: I/II (80/20, 50/50, 100% 2nds, etc.), 3rds packed separately
- Hides are graded after sammying
- No tick and hump, max. 3% brands

Wetblue hides (unsplit / full substance)

All weight ranges are based on green fleshed, trimmed and drumsalted hides.
